

English in use for "Nurses"

HOURS

30

ATTENDEES

10

CONCEPT & GOALS

- To improve listening skill reflecting everyday nursing situations.
- To improve the learners' ability in filling medical forms and documents.
- To strengthen the speaking skills to become more fluent in healthcare situations: admitting a patient and explaining medical procedures.

CONTENT

- Welcoming patients: admission, patient's identity bracelet, giving instructions to patients, recording patients.
- Caring for patients: operation, recovery, talking about pain, checking prescription.
- Showing empathy: pain relief, managing a patient enquiry, information leaflets.
- Dealing with problems and managing embarrassing moments.
- Helping patients: discussing progress, safe swallowing, using a Food Chart.
- Making an appointment: on the phone.

TARGETS

- Medical students and nurses working in key areas of nursing.
- Interpreters and translators wishing to learn specific terms
- B1 level of English required

COURSE STRUCTURE

30-hour course, articulated in 15 2-hour lessons

CERTIFICATION

At the end of the course a certificate of participation will be issued
